### Frequently Asked Questions:

Why play in the OnTurf Sports Baseball League?

For the price of ONE tournament, your team gets all the league benefits, awards, and games plus one non-sanctioned tournament! **Try it Out! Over 234 teams already have.** Contact us at [onturfsports@gmail.com](mailto:onturfsports@gmail.com) and visit us at [www.onturfsports.com](http://www.onturfsports.com).

Who schedules the games?

OnTurf Sports organizes the teams for a single scheduling session where a **Coach or Team Representative** will within 2 hours have your entire game scheduled filled for the season. Paid league teams unable to attend the scheduling meeting are given the team contacts to schedule games at their own pace. *Please be aware that the other teams will have filled many of their possible playing dates at the meeting. If at all possible, please send a representative to the scheduling meeting.*

When do the games have to be played?

Teams have the flexibility to play their league games when they want. At this time, the division winner must be turned into BPA by July 1 to receive their World Series berth in time to validate their berth at a BPA State tournament. However, your team can continue playing league games as long as desired.

Where are the games played?

Games can be played at any location agreed upon by both teams meeting the diamond dimensions outlined by the BPA rule book. If your team does not have a home diamond, your team has the options of playing as a true travel team visiting each team on your schedule and using a combination of tournament games against teams with weekday and/or weekend games scheduled with teams to complete the league game schedule.

Are teams allowed from outside Indiana?

A minimum of 4 teams from any area can join the league and receive all the benefits.

How many games are played?

The league was established to find the best team in each division based on their play over the season. To accomplish this, teams will play a minimum of 1 game against each team in your division. Double headers are encouraged as time permits. Teams are not required to play more than one game with any team unless it is decided by the league at the scheduling meeting to increase the number of games required. Teams are also not limited to one game played with any one team but only those games required to be played will count towards the division standings. Typically teams should expect anywhere from 10 to 18 games in league play.

Does my team have to play every team?

If you would like to win your division title, you must play the minimum number of games against each team.
